

No evidence for broad neuropeptide enrichment; exploratory PDF signal in CePNEM

A AUROC enrichment tests

B Fisher K=20 odds ratios

Error bars: ± 2 SD of degree-preserving permutation null (1000 permutations). Shown for neuropeptide rows only (null SD available). Randi and PDF rows: null mean shown; SD not stored in result files. * Bentley PDF is an exploratory post-hoc annotation (not pre-specified). Threshold: degree-preserving $p < 0.05$.
