B Summary

C Funatlas coverage

Confirmed: q_wt < 0.05 or q_unc31 < 0.05 in Randi/Leher Funatlas. Novel predictions: occ_wt = 0 (never measured). ΔQ values are from CePNEM coordinate (Phase 2 Stage 2). ADEL wt-significant targets in funatlas (ADAL, ADER, AINL, AQR, FLPL) are outside the 61-neuron set.

ADEL→URXL $\Delta Q=-0.535$ (back 7)
