

Predicted dwelling-specific PDF coupling

Traces in B are model predictions derived from CepNEM ΔQ estimates (ADEL-URYVR $\Delta Q=-0.122$, rank 5/1321; ADEL-URYDL $\Delta Q=-0.098$, rank 9/1321). ADEL→URYVR and ADEL→URYDL have zero funatlas observations — never tested experimentally. Behavioral segmentation parameters: EWMA threshold=0.284, $\tau=20$ s (Phase 0 locked values).
